Courses
SAP Financials (**Mandatory**)

The ERP SAP Certificate Course in the Financials Module is specifically tailored to equip you with the essential knowledge and skills needed to navigate and utilize SAP's financial functionalities effectively. This course aims to provide you with a solid foundation in SAP's Financials module and enhance your understanding of financial management within an ERP framework.

Here's a brief overview of the topics covered in this course:

1. Overview of SAP ERP and SAP S/4 HANA, including navigation in SAP S/4 HANA 1809 GUI and Fiori Access.
2. Introduction to the accounting cycle and essential documentation.
3. Explanation of financial accounting applications and organizational structure in SAP S/4 HANA Financials.
4. General Ledger processes, including chart of accounts, GL account management, financial statement generation, and audit trails.
5. Accounts Payable processes, covering vendor data, invoices, payments, part payments, and balance generation.
6. Accounts Receivables processes, including customer data, invoices, incoming payments, and balance generation.
7. Overview of fixed assets accounting and bank ledger processes.
8. Introduction to controlling (CO) applications and their interrelationships with organizational structures.
9. Master data and business processes in cost center accounting, including reporting and hierarchies.
10. Overview of SAP S/4 HANA's financial modules and their integration into business processes.

Courses
SAP Supply Chain Management (Optional)

This SAP Supply Chain Module offers comprehensive training on SAP S/4 HANA, covering essential concepts in materials management, production planning, and sales and distribution. Participants gain practical insights into navigating SAP systems, mastering procurement processes, and optimizing supply chain operations for organizational success.

Here's a brief overview of the topics covered in this course:

1. Overview of SAP, including its product portfolio and navigation in SAP S/4 HANA.
2. Introduction to supply chain business processes and their role in SAP systems.
3. Overview of Materials Management (MM) in SAP S/4 HANA, including procurement processes like purchase requisitions and orders.
4. Master data management in SAP MM, focusing on material, vendor, and information records.
5. Reporting and information extraction from master data and documents in MM.
6. Introduction to Production Planning (PP), covering bill of materials, routing, forecasting, and scheduling.
7. Organizational structures and data related to production and materials in SAP PP.
8. Overview of Sales & Distribution (SD), focusing on the sales cycle, including orders, delivery, and invoicing.
9. Role of master data in SAP SD, including materials, business partners, and conditions.
10. Data analysis and reporting capabilities across SAP modules.

Enterprise Resource Planning

Courses
ERP SAP Human Capital Management (Optional)

This SAP Supply Chain Module offers comprehensive training on SAP S/4 HANA, covering essential concepts in materials management, production planning, and sales and distribution. Participants gain practical insights into navigating SAP systems, mastering procurement processes, and optimizing supply chain operations for organizational success.

Here's a brief overview of the topics covered in this course:

1. Central organizational structures in SAP HCM, including enterprise, personnel, and organizational plans.
2. HCM master data concepts, such as personnel numbers, reference numbers, and InfoTypes.
3. Core HCM processes, including organizational management, personnel administration, recruitment, and talent management.
